Vibration Limit Switch

Vibracon

LVL-B1

- Limit switch for bulk solids
- Compact device
- No calibration: easy commissioning (plug and play)
- Insensitive to build-up: maintenance-free operation
- No mechanically moving parts: no wear, long operating life
- Sensor material stainless steel: hardly any abrasion even with building materials
- Insensitive to external vibration and flow noises

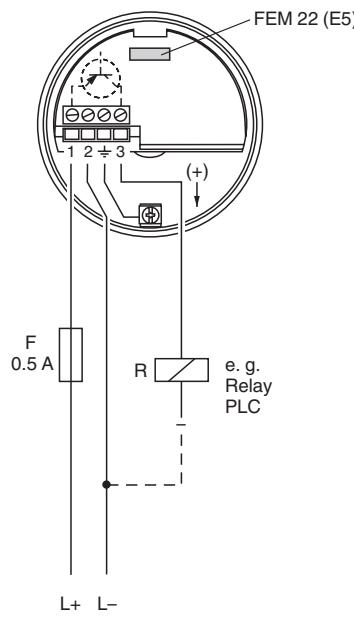

Function

The device is a robust level limit switch for silos with fine-grained or coarse-grained, non-fluidised bulk solids. The various designs means the device has a wide range of applications. Certificates are also available for use in dust incendive hazard areas. Typical applications:
cereals, coffee beans, sugar, animal feed, rice, detergents, dye powder, chalk, gypsum, cement, sand, plastic granules

Connection

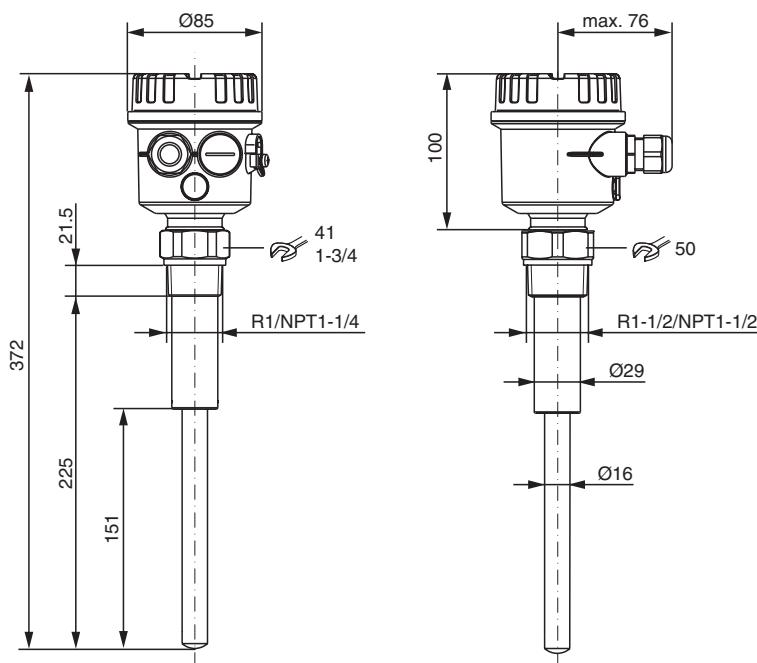

Connection FEM 22 (E5) 3-wire DC connection (example)

- preferably for use with memory programmable controls (PLC), DI modules as per EN 61131-2
- positive signal at the electronics switch output (PNP)
- Output blocked at level limit.

Other connection types see section
electrical connection.

Dimensions

Technical Data

General specifications

Measuring method	A piezoelectric drive excites the vibrating rod of the device to its resonance frequency. If medium covers the vibrating rod, the rod's vibrating amplitude changes (the vibration is damped). The electronics of the device compare the actual amplitude with a target value and indicates whether the vibrating rod is vibrating freely or whether it is covered by medium.
------------------	---

Equipment architecture	The measuring system consists of: - the device with electronic insert - a supply point - the connected control systems, switching units, signalling systems (e. g. lamps, horns, PCS, PLC, etc.)
------------------------	---

Construction type	compact device
-------------------	----------------

Operating mode	MAX = maximum safety: The device switches if the probe is covered or if the supply voltage is disconnected in a safety-oriented manner (signal on alarm). example application: overspill protection MIN = minimum safety: The device switches if the probe is uncovered or if the supply voltage is disconnected in a safety-oriented manner (signal on alarm). example application: dry-running protection
----------------	--

Series	Vibracon LVL-B1
--------	-----------------

Supply

Rated voltage	U_r	electronic insert FEM22 (E5): 10 ... 45 V DC electronic insert FEM24 (WA): 19 ... 253 V AC, 50/60 Hz or 19 ... 55 V DC
---------------	-------	---

Ripple		electronic insert FEM22 (E5): max. 5 V, 0 ... 400 Hz
--------	--	--

Current consumption		electronic insert FEM22 (E5): max. 18 mA
---------------------	--	--

Power consumption		electronic insert FEM22 (E5): max. 0.81 W electronic insert FEM 24 (WA): max. 1.3 W
-------------------	--	--

Reverse polarity protection		separation voltage 2.2 kV
-----------------------------	--	---------------------------

Electrical specifications

Surge protection		electronic insert FEM22 (E5) : overvoltage category III
------------------	--	---

Input

Input signal		probe covered - small amplitude probe not covered - large amplitude
--------------	--	--

Measured variable		level (according to the mounting location and the overall length)
-------------------	--	---

Technical Data

Measurement range		
The measuring range depends on the mounting location of the device		
Output		
Load		<p>electronic insert FEM22 (E5): - load switched via transistor and separate PNP connection - load current: max. 45 V (cyclical overload and short-circuit protection), continuous max. 350 mA - residual current: < 100 µA (for blocked transistor) - capacitive load: max. 0.5 µF for 45 V, max. 1.0 µF for 24 V - residual voltage: < 3 V (for transistor switched through)</p> <p>electronic insert FEM24 (WA): - loads switched via 2 floating change-over contacts - version AC: I max. 6 A, U max. 253 V; P max. 1500 VA, cos φ = 1, P max. 750 VA, cos φ > 0.7 - version DC: I max. 6 A to 30 V, I max. 0.2 A to 125 V - the following applies when connecting a functional extra-low voltage circuit with double insulation as per IEC 1010: sum of voltages of relay output and power supply max. 300 V</p>
Switch-on delay	t_{on}	correct switching after max. 3 s
Output signal		digital
Signal on alarm		<p>electronic insert FEM22 (E5): output signal on power failure or in the event of device failure - < 100 µA</p> <p>electronic insert FEM24 (WA): output signal in event of power failure - relay de-energised</p>
Galvanic isolation		
Input/power supply		electronic insert FEM22 (E5)
Input/Other circuits		electronic insert FEM24 (WA)
Directive conformity		
Electromagnetic compatibility		
Directive 2014/30/EU		EN 61326-1:2006 , EN 61326-2-3:2006
Low voltage		
Directive 2014/35/EU		electronic insert FEM24 (WA) : EN 61010-1:2010
Conformity		
Electromagnetic compatibility		NE 21
Degree of protection		IEC 60529:2001
Vibration resistance		EN 60068-2-27
Climate class		EN 60068, part 2-38, fig. 2a
Measurement accuracy		
Measuring frequency		700 ... 800 Hz
Switching time		when covering the sensor approx. 0.5 s, when uncovering the sensor approx. 1.0 s
Operating conditions		
Installation conditions		
Installation position		see section mounting position
Process conditions		
Process temperature		-40 ... 150 °C (-40 ... 302 °F)
Medium pressure limits		-1 ... 25 bar max. working pressure 25 bar, burst pressure 100 bar
Thermal shock resistance		max. 120 K
State of aggregation		solids
Solid contents		$\leq \varnothing 25$ mm
Bulk density		≥ 200 g/l, not fluidised
Ambient conditions		
Ambient temperature		-40 ... 70 °C (-40 ... 158 °F)
Storage temperature		-40 ... 85 °C (-40 ... 185 °F)
Mechanical specifications		
Degree of protection		IP66/IP67, NEMA 4X
Connection		gland M20 thread G1/2, NPT1/2
Material		F16 housing: PTB-FR, cover with transparent glass made of PA12, EPDM cover seal F18 housing: aluminum EN-AC-AlSi10Mg, plastic coated cover seal: EPDM process connections, sensor: stainless steel 1.4435/316L

Technical Data

Mass	device with F16 housing, electronic insert FEM24 (WA) and R1 thread: approx. 1.0 kg
Dimensions	max. Ø85 mm (3.3 inch), length 372 mm (14.6 inch)
Process connection	thread R1, R1-1/2 acc. to DIN 2999 thread 1-1/4 - 11-1/2 NPT, 1-1/2 - 11-1/2 NPT acc. to ANSI B 1.20.1
Data for application in connection with hazardous areas	
EU-type examination certificate	see instruction manuals
International approvals	
IECEx approval	see instruction manuals
General information	
Supplementary documentation	technical information (T) manuals, brief instructions (BA, KA) instruction manuals

Type Code

Connection

Electronic insert FEM22 (E5)

Three-wire DC connection

- preferred in conjunction with programmable logic controllers (PLC), DI modules as per EN 61131-2
- positive signal at electronics switch output (PNP)
- Output blocked at level limit.

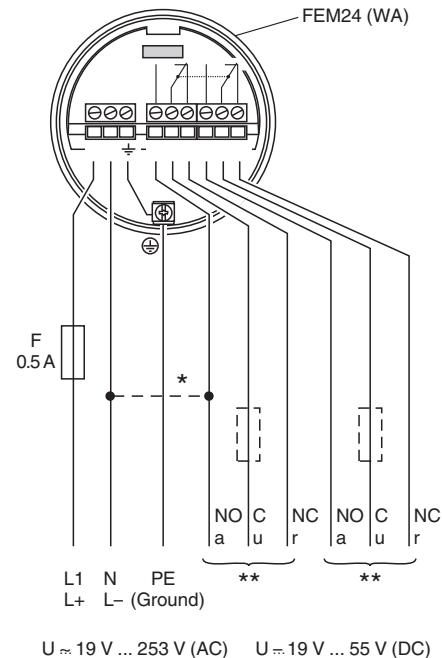

Electronic insert FEM24 (WA)

Universal current connection with relay output

- Power supply:
Please note the different voltage ranges for AC and DC.
- When connecting a device with high inductance, provide a spark arrester to protect the relay contact.
A fine-wire fuse (depending on the load connected) protects the relay contact in the event of a short-circuit. Both relay contacts switch simultaneously.
DPDT (double pole double throw)

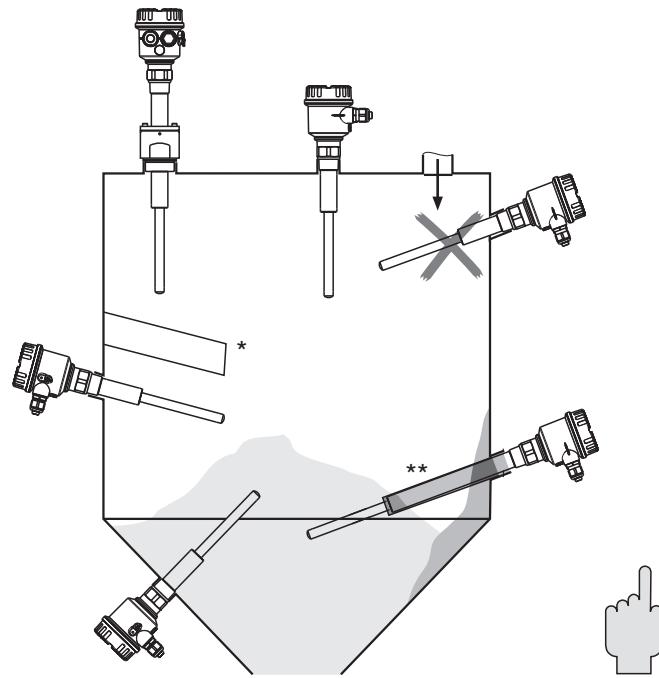

* When jumpered, the relay output works with NPN logic.

** see "Connectable load"

Mounting

Mounting position

Horizontal installation/vertical installation

* with protective cover (to be provided by customer)

** with protecting tube (to be provided by customer)
